Ages: 2-3

What will happen to the juice?

1 min

What to do:

1. Name the situation: "We poured juice into the glass."
2. Ask: "What will happen next?" (we'll pick it up, take a sip, it'll be empty…).
3. Encourage every answer: "And what happens after that?"

Try this too:

"And what happened BEFORE we poured the juice?" (it was in the fridge → we bought it at the shop…).

Adaptation

- **Too hard** - keep it to just one step forward.
- **Too easy** - stretch the chain to 3-4 steps in both directions.

When you revisit in 2 months:

"Remember the glass of juice? Today, tell me the whole story yourself - from the very beginning to the very end."

What we practised:

"'What came before - what comes next' is the foundation of all future logic and storytelling. Every chain like this lays another brick in that foundation."
